

## **Abstract**

A fish rearing tank comprising the features of:

a) an egg-shaped shell with a generally vertical long axis and gradually narrowing shape towards its tip volume portion;

b) said shell forming a generally rigid tank;

c) said shell being closed,

d) said shell having one or more water inlets,

e) said shell having one or more water outlets,

said egg-shaped tank for holding a water volume in its major lower volume portion and enclosing air in its minor, upper tip volume portion.
