**Regarding:** Patent Application in Norway No. 20180759  
**Applicant:** Bergen Carbon Solutions AS  
**Title:** Apparatus and method for purification of carbon nanomaterial  
**Our ref.:** P28496NO00

Dear Sirs

We refer to the Office Action issued by NIPO on April 7, 2020, wherein it is requested that a few formal defects are corrected.

In claim 1, the incorrect introduction of the term “magnetic impurities” has been corrected to the term “metal particles”, which is used throughout the application as already noted by the Examiner.

In claim 4, the sentence “after the sonication step and before the filtration step” has been deleted. This sentence was introduced when the claim was amended to two-part form as a response to the previous office action. However, as the original claim did not require the steps to be in a specific sequence, the deleted sentence is an unnecessary limitation to the claim, and the original claim provides the basis for deleting this sentence.

The description and Norwegian translation of the claims have been amended correspondingly.

Yours faithfully

**HÅMSØ PATENTBYRÅ AS**

Jørn Døvling Kaspersen
