Hej Rasmus,

Hermed bekræftes, at du og Odd deltog på EUfishmeals konference i Reykjavik 2004 og præsenterede vedlagte indlæg om membranfiltrering af limvand i en fiskemelsproces.
Billeder fra konferencen er vedlagt.

Best regards

Frank Minck

Hei igjen;

Sender på ny min forespørsel fra 19. juni d.å. Som meddelt ville det vært fint om du kunne sende en bekreftelse på min og Odd Henning Sirnes' tilstedeværelse og det innlegg om membranfiltrering som vi fremførte.
På forhånd hjertelig takk for hjelpen.

Rasmus.

Dear Frank Minck;

You may recall the EU Fishmeal conference in Reykjavik back in 2004 and the presentation given by Mr. Odd Henning Sirnes (Membranteknikk AS) and myself about membrane filtration in the fish meal process. Later that year the same presentation was given in Denmark for the Danish Fishmeal Association and in Bergen for NOFIMA. Since then the technological development has continued, most significant change the replacement of former spiral with the more updated ceramic membranes. But that's another story.

The reason for contacting you a kind request for verifying our presence and presentation at the mentioned meeting in Reykjavik back in 2004. Basically for documenting the time for introducing our membrane filtration concept to the international fishmeal industry. Due to a dispute with another supplier of membrane filtration system, it would be a great help for verifying our timing. Agenda for the Reykjavik meeting enclosed.

Thanks in advance for your cooperation.

Very best regards;

Rasmus.
