

Fig. 1

Fig. 2

This diagram shows a cross-section of a complex, multi-layered cylindrical assembly. The central part consists of several concentric layers. A central vertical channel is visible, with a double-headed arrow indicating its extent. The layers are labeled with numbers: 1 points to the outermost layer; 2, 4, 6, 8, 10, 12, 14, 16, 18, and 20 point to various internal layers and components. 22 points to a central vertical element. 24 points to a base or support structure. 25 points to a specific layer. 26 and 28 point to components at the top of the assembly. The diagram uses different hatching patterns to distinguish between various materials or components.
