

To whom it might concern

I am going to try and keep this simple.

I am the artist Banksy, i am also known as Banksy.

I want you all to listen to this carefully, let the norgay company/ person register this vine thing !.

Pest control stay the fuck away from this.

Get my lawyers/barristers in the uk and/ or in the us or wherever, to redraw or remove if there is any complaints against this registration of this vine thing, then tell them to stay the fuck away from this and stay quiet.

I really don't know what the fuck you, or some people think that you are doing,? but this is really far beyond and over your play grade`s.

So lets keep this simple: I the artist Banksy has no objection to this registration from this Norwegian, company guy.

The pest control company has no objections to the registration either.

The order of this shit is going to stay as it is and/ or

how it was.

The only thing the copyright people are going to do is let this registration from this norgay company/ windtong person go thru as soon as possible.

«Then a message to my love:

If you keep sending me hundreds of pages of paperwork honey, i might get a little pissed off.

I told you this so many times sweetheart, and if you open your eyes and look around you, you might register that i might be just a tiny, little bit annoyed right now.

So to my tiny little beautiful princess you know i really love you and all of my girls, and to me you are all princesses.

But to be completely honest some of you can really act like queen`s, and some of you can really act like drama queen`s when you get jealous of etchother.

So be a sweet heart and tell him that, also tell him the same goes for his butty boy.

Can you also be a sweetheart and call Bill Gates, or call some of my other friends and ask if he or some one could lend me a million dollars for some decease control.

Then if you can send that money as soon as possible to that Norwegian guy, make it look like it came from camon island or something.

With this crona so lo in the guys country, i think that

would be enough that the guy could pay off his debt and buy a new car.

I kind of need him to be able to piss off some people and move around.

Thank you

c you soon hooney. »

If anybody has any questions about if i use my copyrights, yes i do.

I have been doing that for many decades, and i have created a lot of shit thru the years, and if you see i still kind of do that.

I create and created everything from coffee mugs, self standing pens, to space rockets and cars and now i'm going to create some respirator`s and some medicine for some pest/ virus thing.

Some of the shit i create and created you people kind of reminded me of when ever you send me this type of letters.

«Can anybody ask how i did on that Big eye test thing, last i saw of that film guy it looked like he had taken up tennis or some thing.

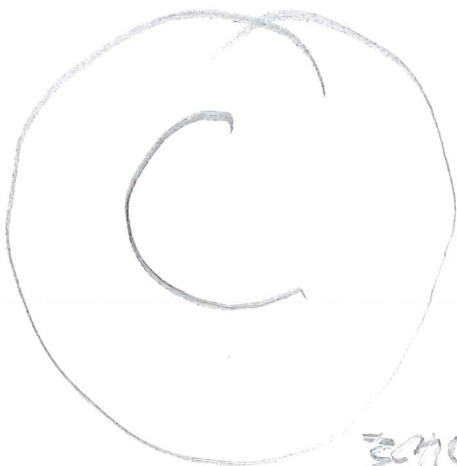

I really don't know about the tennis thing but he was pushing around some bright yellow tennis balls when i saw him on the news.»

Try him i said hi
