Hi

Sorry to disturb, when can we expect the examination report in this case?

Kind regards

Harald Furu

Dear Margrethe,

I'm the co-inventor and co-application for the patent N 20210133 (Pre stack Solutions-Geo AS). The other author and the owner of the applicant company is in the copy. The company that applied for the patent for us is the Apace IP AS. I believe they are on vacation and do not see my mail.

We have submitted the patent in February. I was told that we would hear about the result earliest in June-July 2021.

We are a very small company. In the present crisis, we are very dependent on the result of the patent. We are selling services based on our inversion. Still, for big companies like Equinor, we must release the details we are doing, and they are even interested in supporting our international patent. If any chance to process our application faster, we appreciate it. As soon as the patent is finished, we can confidently rely on getting salaries, providing more services.

Kind regards,  
Vita

Vita Kalashnikova
