Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

Patentkrav

1. Kombinasjon av:

- et antisens-oligonukleotid omfattende en sekvens som er komplementær til en del av humant dystrofin-pre-mRNA-ekson 51, og oligonukleotidet er representert ved SEQ ID NO:204

5 og

- en tilleggsforbindelse for å redusere inflammasjon, hvori denne forbindelsen omfatter et steroid, der kombinasjonen er for bruk som et medikament for å lindre ett eller flere symptom(er) på Duchennes muskeldystrofi hos individet.

10 2. Kombinasjon for bruk ifølge krav 1, hvori fraværet av eksonet fra mRNA produsert av dystrofin-pre-nRNA-et genererer en kodingsregion for et funksjonelt dystrofin

15 protein.

20 3. Kombinasjon for bruk ifølge krav 1 eller 2, hvori oligonukleotidet omfattende RNA.

4. Kombinasjon for bruk ifølge krav 3, hvori RNA-et inneholder en 2'-O-metylmodifisert ribose (RNA).

25 5. Kombinasjon for bruk ifølge krav 3 eller 4, hvori oligonukleotidet er et 2'-O-metyl-fosfortioat- oligoribonukleotid.

6. Kombinasjon for bruk ifølge et hvilket som helst av kravene krav 1 til 5, hvori oligonukleotidet er en peptidnukleinsyresyre, låst nukleinsyresyre, morfolinofosfordiamidat eller en hvilken som helst kombinasjon derav.

30 7. Farmasøytisk preparat omfattende

- en kombinasjon som definert i et hvilket som helst av kravene 1 til 6

og

- en farmasøytisk akseptabel bærer, adjuvant, tynner og/eller eksipient.
