Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here:

Patentkrav

1. Humant antistoff eller antigen-bindende fragment av et humant antistoff som spesifikt binder humant proprotein konvertasesubtilisin/keksin type 9 (hPCSK9) omfattende en HCVR med SEQ ID NO:90 og en LCVR med SEQ ID NO: 5 92.
2. Antistoff ifølge krav 1, som er et IgG1 eller IgG4.
3. Isolert nukleinsyremolekyl som koder for et antistoff eller antigen-bindende fragment ifølge krav 1 eller krav 2.
4. Ekspresjonsvektor omfattende et nukleinsyremolekyl ifølge krav 3.
- 10 5. Fremgangsmåte for å fremstille et anti-humant PCSK9-antistoff eller antigen-bindende fragment av et antistoff, omfattende trinnene å innføre en ekspresjonsvektor ifølge krav 4 i en isolert vertcelle, dyrke cellen under betingelser som tillater produksjon av antistoffet eller fragmentet derav, og isolere det således fremstilte antistoff eller fragment.
- 15 6. Farmasøytisk sammensetning omfattende et antistoff eller antigen-bindende fragment ifølge krav 1 eller krav 2, og en farmasøytisk akseptabel bærer.
7. Antistoff eller antigen-bindende fragment av et antistoff ifølge krav 1 eller krav 2 for anvendelse for å svekke eller hemme en PCSK9-mediert sykdom eller tilstand i et individ, hvor den PCSK9-medierte sykdom eller tilstand er 20 hyperkolesterolemi.
8. Anvendelse av et antistoff eller antigen-bindende fragment av et antistoff ifølge krav 1 eller krav 2 ved fremstilling av et legemiddel for anvendelse for å svekke eller hemme en PCSK9-mediert sykdom eller tilstand i et individ, hvor den PCSK9-medierte sykdom eller tilstand er hyperkolesterolemi.
