Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

## PATENTKRAV

1. Sammensetning for anvendelse i behandling av moderat til alvorlig hypertriglyseridemi hos et individ som har et fastende baselinje-triglyseridnivå på omtrent 500 mg/dl til omtrent 1500 mg/dl,
- 5 hvori sammensetningen omfatter eikosapentaensyre-etyler, hvori eikosapentaensyre-etyleren omfatter minst 96 vekt% av alle fettsyrene som er til stede i sammensetningen, hvori sammensetningen ikke inneholder mer enn 4 vekt% av totale fettsyrer som er forskjellig fra
- 10 eikosapentaensyre-etyler, og sammensetningen inneholder omtrent 0,1 % til omtrent 0,6 % av minst én fettsyre som er forskjellig fra eikosapentaensyre-etyler og dokosaheksaensyre, og
- hvor 4 kapsler, som hver inneholder 1 g av sammensetningen, blir administrert til individet daglig.
