Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

LAG-3 doseringsregime for anvendelse i behandlingen av kreft**Patentkrav**

1. Rekombinant LAG-3-protein eller derivat av samme, som er en mutant eller et fragment av LAG-3 som opprettholder LAG-3 sin evne til å binde MHC-klasse-II-molekyler, som framkaller en monocytt-formidlet immunrespons, for anvendelse i behandlingen av kreft ved administrering av et effektivt flertall doser av det rekombinante LAG-3-proteinet eller derivat av samme, hvori hver dose av det rekombinante LAG-3-proteinet eller derivat av samme er i intervallet 6-30 mg.
2. Rekombinant LAG-3-protein eller derivat av samme for anvendelse ifølge krav 1, hvori nevnte flertall med doser av et rekombinant LAG-3-protein eller derivat av samme skal administreres som følger: én dose hver én til flere uker i minst 12 uker, og fortrinnsvis i minst 24 uker, adskilt av administreringsfrie intervaller på 13 ± 2 dager.
3. Rekombinant LAG-3-protein eller derivat av samme for anvendelse ifølge krav 1 eller 2, hvori det rekombinante LAG-3-proteinet eller derivat av samme skal administreres systemisk, fortrinnsvis som en subkutan, intramuskulær eller intravenøs injeksjon.
