Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

Patentkrav

1. Peptidomimetisk makrosyklisk ring som forstyrrer bindingen mellom p53 og HDM2 eller HDMX, og som har en aminosyresekvens minst 60 % identisk med:

Leu Thr Phe \$₁ Glu Tyr Trp Ala Gln Leu \$₂ Ala;

- 5 hvori \$₁, er en α,α-disubstituert aminosyre i R-konfigurasjonen, hvori en substituent er en metylgruppe og den andre substituenten er en bindeleddgruppe til \$₂; og hvori \$₂ er en α,α-disubstituert aminosyre i S-konfigurasjonen, hvori en substituent er en metylgruppe og den andre substituenten er bindeleddgruppen til \$₁; og hvori bindeleddgruppen, som starter med \$₁ er $-(CH_2)_6-CH=CH-(CH_2)_3-$.

10

2. Farmasøytisk sammensetning som omfatter den peptidomimetiske makrosykliske ringen ifølge krav 1.

- 3.** Peptidomimetisk makrosyklisk ring ifølge krav 1 for anvendelse ved behandling av
15 kreft hos et individ.

4. Farmasøytisk sammensetning ifølge krav 2 for anvendelse ved behandling av kreft hos et individ.
