Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

Patentkrav:

1. Fremgangsmåte for fremstilling av 100 gram eller mer av en forbindelse med formel IVa:

fra en forbindelse med formel IIIa:

hvor:

R er en etylgruppe;

Y er t-butoksykarbonyl (BOC); og,

X er benzyll;

hvor fremgangsmåten omfatter å justere pH i et reaksjonsmedium som omfatter forbindelsen med formel IIIa til 2,0-5,0 ved tilsetning av eddiksyre, og å utføre en hydrogenolyse av X ved hjelp av en våt palladium-katalysator.

2. Fremgangsmåte som angitt i krav 1, hvor katalysatoren er palladium på karbon med en palladiumbelastning på 1-10%.
3. Fremgangsmåte som angitt i hvilket som helst av kravene 1 eller 2, hvor reaksjonsmediet ytterligere omfatter et løsningsmiddel.
4. Fremgangsmåte som angitt i krav 3, hvor løsningsmiddelet er etanol.
5. Fremgangsmåte som angitt i hvilket som helst av kravene 1 til 4, hvor pH justeres til 2,5-3,5.
