Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

PATENTKRAV

1. Sammensetning for anvendelse i behandling av moderat til alvorlig hypertriglyseridemi hos et individ med behov for dette, som omfatter: tilveiebringe
5 et individ som har et fastende baselinje-triglyseridnivå på omtrent 500 mg/dl til omtrent 1500 mg/dl og administrere sammensetningen til individet, hvori sammensetningen omfatter omtrent 4 g eikosapentaensyre-etyler, hvori sammensetningen i det vesentlig ikke omfatter noe dokosaheksaensyre, og hvori sammensetningen administreres til individet én gang per dag.
- 10
2. Sammensetning for anvendelse ifølge krav 1,
hvori eikosapentaensyre-etyleren omfatter minst 96 vekt% av alle fettsyrer som er til stede i sammensetningen, sammensetningen inneholder ikke mer enn 4 vekt% av totale fettsyrer annet enn eikosapentaensyre-etyler, og sammensetningen
15 inneholder omtrent 0,1 % til omtrent 0,6 % av minst én fettsyre som er forskjellig fra eikosapentaensyre-etyler og dokosaheksaensyre.
