Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

Patentkrav

1. Sammensetning omfattende et monoklonalt antistoff som spesifikt binder CD47 på overflaten av kreftceller og hemmer dets interaksjon med SIRPa-reseptor på overflaten av fagocytiske celler, til anvendelse i behandling av en fast tumor ved å øke fagocytose av kreftceller fra den faste tumor i et menneskelig individ, hvor nevnte antistoff oppregulerer fagocytose av nevnte kreftceller ved å hemme bindingen av CD47 på overflaten av kreftcellene til SIRPa-reseptor på overflaten av fagocytiske celler.
- 10 2. Sammensetning til anvendelse ifølge krav 1, hvor nevnte kreftceller er metastatiske tumorceller.
3. Sammensetning til anvendelse ifølge krav 1 eller krav 2, hvor antistoffet er et humanisert antistoff.
