Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

Patentkrav

1. Framgangsmåte for framstilling av Forbindelse 1,

(1)

omfatter trinnet med å reagere Forbindelse 108,

(108)

5

hvor R er metyl eller etyl, med hydroksylamin, for derved å produsere Forbindelse 1.

2. Framgangsmåte ifølge krav 1 omfatter videre trinnet med å reagere Forbindelse 107

(107)

med en forbindelse med formelen

10

for å produsere Forbindelse 108.

3. Framgangsmåte ifølge krav 2, omfatter videre trinnet med å reagere Forbindelse 106

2

med en forbindelse med formelen

hvor R er metyl eller etyl, for å produsere Forbindelse 107.

- 5 4. Framgangsmåte ifølge krav 3, omfatter videre trinnet med å reagere Forbindelse 105,

med natriumborhydrid i en blanding av metylamin og metanol for å produsere Forbindelse 106.

5. Framgangsmåte ifølge krav 4, omfatter videre trinnet med å reagere Forbindelse 104,

- 10 med n-butyllithium i en blanding av tetrahydrofuran og N,N-dimetylformamid for å produsere Forbindelse 105.

6. Framgangsmåte ifølge krav 5, omfatter videre trinnet med å reagere Forbindelse 103

med morfolin i metanol for å produsere Forbindelse 104.

- 15 7. Framgangsmåte ifølge krav 6, omfatter videre å reagere forbindelse 102

3

(102)

med POCl_3 for å produsere Forbindelse 103.

8. Framgangsmåte ifølge krav 1, omfatter trinnene med å

(a) reagere Forbindelse 101

(101)

5

med urea eller KOCN for å produsere Forbindelse 102

(102);

(b) reagere forbindelse 102 med POCl_3 for å produsere Forbindelse 103

(103);

10

(c) reagere Forbindelse 103 med morfolin i metanol for å produsere Forbindelse 104

(104)

(d) reagere Forbindelse 104 med n-butyllithium i en blanding av tetrahydrofuran og N,N-dimetylformamid for å produsere Forbindelse 105,

4

(105)

(e) reagere Forbindelse 105 med natriumborhydrid i en blanding av metylamin og metanol for å produsere Forbindelse 106,

(106)

5 (f) reagere Forbindelse 106 med en forbindelse med formelen

hvor R er metyl eller etyl, for å produsere Forbindelse 107

(107)

(g) reagere Forbindelse 107 med formelen

10

for å produsere Forbindelse 108, og

(108);

(h) reagere Forbindelse 108 med hydroksylamin.

9. Forbindelse med formelen (108)

hvor R er etyl eller metyl.
