Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

**Patentkrav**

1. Et bifunksjonelt molekyl som omfatter en polypeptidbindingspartner spesifikk for en gitt pMHC-epitop, og et immuneffektorpolypeptid, N-enden til pMHC-bindingspartneren er bundet til C-enden til immuneffektorpolypeptidet, hvor polypeptidbindingspartneren er et antistoff.
2. Bifunktionelt molekyl ifølge krav 1, hvor immuneffektorpolypeptidet er et antistoff som spesifikt binder til et antigen presentert av en T-celle.
3. Bifunktionelt molekyl ifølge krav 2, hvor antistoffet er et scFv-antistoff.
4. Bifunktionelt molekyl ifølge krav 2 eller krav 3, hvor immuneffektorpolypeptidet er et anti-CD3-antistoff.
5. Bifunktionelt molekyl ifølge krav 4, hvor immuneffektorpolypeptidet er OKT3.
6. Bifunktionelt molekyl ifølge krav 4, hvor immuneffektorpolypeptidet er UCHT-1.
7. Bifunktionelt molekyl ifølge krav 4, hvor immuneffektorpolypeptidet er BMA031.
8. Bifunktionelt molekyl ifølge krav 4, hvor immuneffektorpolypeptidet er 12F6.
9. Bifunktionelt molekyl ifølge krav 1, hvor immuneffektorpolypeptidet er et cytokin som modulerer lymfocyt-immunosuppressiv eller immunostimulerende aktivitet.
10. Bifunktionelt molekyl ifølge hvilket som helst av de foregående krav, hvor polypeptidbindingspartneren og immuneffektorpolypeptidet er koblet direkte.
11. Bifunktionelt molekyl ifølge hvilket som helst av kravene 1 til 9, hvor polypeptidbindingspartneren og immuneffektorpolypeptidet er koblet indirekte via en linkersekvens.
12. Bifunktionelt molekyl ifølge krav 11, hvor linkersekvensen er mindre enn 12, mindre enn 10 eller fra 5-10 aminosyrer i lengden.
