Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

PATENTKRAV

1. Farmasøytisk sammensetning omfattende en kombinasjon av et humanisert B-Ly1-antistoff som er afukosylert med en mengde fukose på 60 % eller mindre av den totale mengden oligosakkarider ved Asn297, og 4-(4-{[2-(4-klorfenyl)-4,4-dimetylsykloheks-1-en-1-yl]metyl}piperazin-1-yl)-N-({{3-nitro-4-[[(tetrahydro-2H-pyran-4-ylmethyl)amino]fenyl}sulfonyl}-2-(1H-pyrrolo[2,3-b]pyridin-5-yloksy)benzamid (GDC-0199, ABT199) og 4-{[(2R,3S,4R,5S)-4-(4-klor-2-fluor-fenyl)-3-(3-klor-2-fluor-fenyl)-4-cyano-5-(2,2-dimetyl-propyl)-pyrrolidin-2-karbonyl]-amino}-3-metoksy-benzosyre (RG7388) eller et salt derav for anvendelse i behandling av kreft.
2. Farmasøytisk sammensetning for anvendelse ifølge krav 1, hvorimot kreften er en CD20-uttrykkende kreft.
3. Farmasøytisk sammensetning for anvendelse ifølge krav 2, hvorimot den CD20-uttrykkende kreften er et lymfom eller lymfatisk leukemi.
4. Farmasøytisk sammensetning for anvendelse ifølge et hvilket som helst av kravene 1–3, hvorimot det afukosylerte anti-CD20-antistoffet er obinutuzumab.
5. Farmasøytisk sammensetning for anvendelse ifølge et hvilket som helst av kravene 1–4, hvorimot ytterligere ett eller flere andre cytotoxiske midler, kjemoterapeutiske midler eller anti-kreftmidler, eller forbindelser eller ioniserende stråling som forsterker effekten av slike midler, administreres.
