Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

Patentkrav

- 5 **1.** Produkt omfattende et follikkelstimulerende hormon (FSH) for anvendelse ved behandling av infertilitet hos en pasient som har serum-AMH-nivå på 0,05 pmol/l eller høyere, hvori behandlingen er **karakterisert ved at** en daglig dose på 15 µg til 24 µg humant avledet rekombinant FSH administreres.
- 10 **2.** Produkt for anvendelse ifølge krav 1, hvori produktet omfatter en daglig dose på 15 µg, 18 µg eller 24 µg humant avledet rekombinant FSH.
- 15 **3.** Produkt for anvendelse ifølge krav 1 eller krav 2, hvori behandlingen av infertilitet omfatter et trinn for å bestemme serum-AMH-nivået til pasienten, og et trinn for å administrere dosen til en pasient som har et serum-AMH-nivå på 0,05 pmol/ eller ovenfor.
- 20 **4.** Produkt for anvendelse ifølge et hvilket som helst foregående krav, hvori det humant avledede FSH-et inkluderer α2, 3- og α2, 6-sialylering.
- 5.** Produkt for anvendelse ifølge et hvilket som helst foregående krav, hvori produktet videre omfatter hCG.
