Enclosed is a translation of the patent claims in Norwegian. Please note that as per the Norwegian Patents Acts, section 66i the patent will receive protection in Norway only as far as there is agreement between the translation and the language of the application/patent granted at the EPO. In matters concerning the validity of the patent, language of the application/patent granted at the EPO will be used as the basis for the decision. The patent documents published by the EPO are available through Espacenet (<http://worldwide.espacenet.com>) or via the search engine on our website here: <https://search.patentstyret.no/>

1

**5 Patentkrav**

1. Monoklonalt antistoff rettet mot CD47, som blokkerer interaksjonen av CD47 med SIRPa, for anvendelse innen behandlingen av en pre-leukemisk tilstand ved å hemme engraftment av AML LSCs (leukemiske stamceller), hvori blokering av interaksjonen av CD47 med SIRPa stimulerer fagocytose av AML LSCs gjennom makrofager.  
10
2. Det monoklonale antistoffet for anvendelse ifølge krav 1, hvori den pre-leukemiske tilstanden er et myelodysplastisk syndrom (MDS) eller en myeloproliferativ lidelse (MPD).  
15
