Internasjonale varemerkeregistreringer

Internasjonale varemerkeregistreringer som gjelder for Norge ved utpekning etter Madridprotokollen. Innsigelsesperioden utløper 3 mnd. fra kunngjøringsdato, jf. varemerkeloven § 71.

Generell informasjon om kunngjøringer etter Madridprotokollen

Int.reg.nr.: Det vil si det internasjonale registreringsnummer som WIPO har gitt søknaden om internasjonal registrering.

Int.reg.dato: Det vil si den dato en internasjonal registrering anses for å ha skjedd, jf. varemerkeloven § 72 og Madrid-protokollen artikkel 3 (4).

Dersom den internasjonale registreringen beslattes gjeldende i Norge, vil registreringsperioden på 10 år regnes fra den internasjonale registreringsdatoen.

Etterfølgende

utpekingsdato: Det vil si datoen for rettsvern i Norge hvor utpekingen ikke har skjedd i forbindelse med den internasjonale registreringen.

Prioritet: Internasjonale søknader kan påberope seg prioritet etter Pariskonvensjonen artikkel 4 fra det land merket først ble søkt registrert. Dette vil ofte være søkerens hjemland idet en internasjonal registrering må bygge på en hjemlands-registrering eller -søknad.

Besluttet gjeldende

dato i Norge: Det vil si den datoen det innføres i varemerkeregisteret at den internasjonale registreringen gjelder i Norge, jf. varemerkeloven § 70.

Klagenemndas avgjørelse av 2018.05.15:

1 Klagen forkastes.

2 Internasjonal registrering nr. 1142604, med søknadsnummer 201300171, nektes virkning i Norge for «apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity» i klasse 9 og «block-type thermal power stations» i klasse 11.

3 Den internasjonale registreringen gis virkning i Norge for alle varene og tjenestene i klasse 7, 12, 37, 39 og 40, samt varene «batteries, electric; accumulators, electric; accumulator boxes» i klasse 9.

 Klasse 6 Base metals and alloys thereof; metallic construction materials; transportable metallic constructions; metallic materials for railway tracks; non-electrical metallic cables and wires; ironmongery, small items of metal hardware; metal pipes; base metals and alloys thereof in the form of powder as well as in the form of wire or rods for use with metallisation by projection and plasma coating, wires and rods made of molybdenum or chrome or wires and rods consisting of these materials; lining material made of metallic materials as well as layers thereof, particularly surface layers of workpieces, tools and machine parts; projection rooms made of metal, dust removal and collection rooms made of metal.
 Klasse 7 Machines for working metal, wood and plastics, machines for the chemical, agricultural, mining, textile, drinks industry, construction machines, packaging machines and machine tools; motors and engines (except for land vehicles); machine coupling and transmission elements (except for land vehicles); apparatus for coating substrates, apparatus for treating object surfaces, particularly for improving, hardening and modifying according to the composition of the substrate surface; automatic control devices for surface coating and treating apparatus; spray guns for coating by projection, by plasma and by powder as well as related apparatus, namely powder loading apparatus, heat exchangers, cable reels, valves, air compressors and nozzles for sandblasting; compressed air cleaning apparatus for surface treatment, sand-blasting apparatus.
 Klasse 9 Scientific, nautical, surveying, electric (included in this class), photographic, cinematographic, optical, weighing, measuring, signaling, monitoring, (inspection), rescue (life-saving) and teaching apparatus and instruments; apparatus for recording, transmitting and reproducing sound or images; magnetic recording media, phonograph records;

automatic vending machines and mechanisms for coin-operated apparatus; calculators, data processing and computer equipment; control equipment and software for substrate surface treatment apparatus; electric and electronic control apparatus to be used with apparatus for flame metallizing, plasma coating and powder coating; apparatus for measuring and adjusting the flow of gas in coating apparatus; electronic control apparatus to be used with apparatus for coating and metallizing, namely transformers, rectifiers, igniting apparatus, switches and flame detectors; electric coating-thickness measuring apparatus.

Klasse 11 Apparatus for lighting, heating, steam generating, cooking, refrigerating, drying, ventilating, water supply and sanitary installations; apparatus for air and gas pollution control; gas and compressed air control mechanisms; apparatus for decontaminating and drying compressed air for use with spray guns.

Klasse 19 Coating materials made of ceramic and plastic materials as well as combinations of metallic, ceramic and plastic materials and layers made thereof, particularly surface layers applied to workpieces, tools and machine parts.

Klasse 37 Cleaning of substrates by mechanical means, particularly using particulate solid spraying; assembling installations for coating objects.

Klasse 40 Applying coatings to workpieces, prefabricated elements, strips of materials, tools and machine parts made of metal, ceramic, plastics, fibre reinforced plastics, particularly applying coatings made of metallic, ceramic, plastic materials as well as composites made of two or more of these materials; object surface treatment, namely improving, hardening and modifying according to surface composition.

Klasse 42 Scientific and industrial research; computer programming; planning of facilities for object coating; development of materials and apparatus for object surface coating and treating.

Klasse 7 Machines for domestic and household use, namely, electronic power operated coffee grinders; mechanical mixing machines; electric food blenders for domestic use; electric juice extractors; electric food processors, and electric food preparation machines, vegetable grinders and slicers; electric motors other than for land vehicles, steam and gas turbines and parts thereof; electric generators and their parts; aircraft engines; gas compressors, air-conditioning compressors; washing machines; gas and electric clothes drying machines; dishwashers; garbage disposers and compactors; electric knives; electric can openers; axial and centrifugal compressors; reciprocating compressors; screw and vane compressors; rotary, vacuum, electric, submersible and centrifugal pumps; turbo expanders, namely, air and electric compressors; CNG refueling machines for land vehicles and industrial equipment and accessories and parts for all the foregoing, namely, pumps, valves, fuel filters, filter casings, distributor rotors, blades, bearings, and mechanical seals; steam condensers; pumps, namely, centrifugal pumps, diaphragm pumps, bellows pumps and process and transfer pumps for water and wastewater treatment systems; regulators being parts of machines; filter cartridges for various industrial machines for filtration

applications, namely, for the filtration of beer in the brewing industry, and other specialty chemicals; machines for the feeding and application of chemicals for industrial uses; boat engines, turbochargers for engines, and fuel injectors; vehicle engine parts, namely, high frequency motor spindles with high frequency electric converters and power supply units, rocker arms, push rods, oil coolers, crankcase breathers, oil tanks, ignition parts for internal combustion engines, namely, points, radiators, water pumps, starter motors, pumps for cooling engines, engine bearings, engine camshafts, engine rods and engine mufflers; apparatus, equipment and instruments for the generation of power, namely, electric generators and wind powered electricity generators; turbines; turbines for power generation; wind turbines for power generation; engines for the generation of electricity, and parts and fittings for all the aforesaid; electrical power generation products.

Klasse 9 Navigation apparatus for vehicles in the nature of on-board computers; optical inspection apparatus for railway system use; railway signals, namely, crossing warning systems; high-frequency switching power supplies; electrical engine controllers; global positioning system (GPS) consisting of computers, computer software, transmitters, receivers, and network interface devices for the rail and transit industries; electrical devices and electrical power distribution products, namely, capacitors, circuit breakers, circuit breaker load centers, circuit closers, circuit interrupters, commutators, contactors, current rectifiers, current limiters, electric contacts, electric collectors, electric conductors, electric connectors, electric controllers, electric inductors, electric power supplies, electricity distribution boards and boxes, electricity distribution consoles, electricity switchboards, and switchboxes; computer software for persons who troubleshoot and maintain programmable controllers; computer software for analyzing blood vessels including cardiac vessels which also provides calculation functions with respect to blood vessels; computer software for use with medical patient monitoring equipment; computer software for receiving, processing, transmitting and displaying data, for use in developing personalized asset allocation programs; computer software for collecting data involving vital medical signs; computer software for use in electrical power systems analyses; computer software for regulating and managing vehicle fleet maintenance services; computer software for use by customers to obtain lease portfolio information; computer software for a radiology information system for use by radiologists and radiology departments in the database management of employee and patient information; computer software for graphical user interface; computer software for underground navigation, namely, for navigation of down-hole probe assembly for oil drilling and drilling assemblies for routing underground utilities; telephones; telephone answering machines; cordless telephones, cordless headset telephones; digital messaging systems; televisions; television remote controls; DVD players; DVD remote controls; batteries; electrical power distribution products and electrical voltage and overvoltage surge products, namely, arresters, busways, lighting contactors, controllers, and input/output devices; fuses; lighting controllers; switch boxes; LEDs, namely, light emitting diodes; voltage regulators for electric power; voltage surge protectors; voltage surge suppressors; voltmeters; relays and timers; solenoids and limit switches; full-voltage manual starters; reduced voltage starters; electrical switches and disconnects; circuit board terminal blocks and pumping panels; transformers; electrical lighting and power circuit boards; electrical wires; cables and conductors; electrical wiring and fixtures; lightning arrestors; electricity meters; power meters; grounding resistors; humidity and temperature sensors; industrial calibration sensors; motor control centers; electrical resistance heating wires; electrical controllers;

apparatus for electrophoresis not for medical purposes; chromatography columns and pumps; apparatus for conformations systems, namely, computer hardware and software for processing biological information; scintillation counter to measure beta-emitting nuclides; imaging apparatus for radioactive and luminescent emissions, namely, CCD cameras and scanners; synthesis and purification integrated systems, namely, chromatography columns, cartridges, fraction collectors, mixers, monitors, pumps, recorders, and analysis software; apparatus for microarrays, namely, probes, slides, buffers, bacterial controls, racks, and trays; laboratory glassware; computer software for hospital operating room management; computer software for critical care information management; industrial process control software; computer software programs and program manuals sold as a unit for use in factory management; software for creating graphics displays and editing dynamic data interfaces for real time graphics applications for industrial and business applications; communications software for connecting computer network users; factory automation software for control, monitoring, simulation, communications, data logging and collection, and factory automation; software to integrate manufacturing machine operations, control processes, to provide data for visualization, to track problems and generate production reports; packaged software for use in the operation and programming of grinding machines in the manufacturing industry; industrial process control hardware, namely, computer monitors, laptop computers, ethernet cards and cables; computer networking hardware; memory cards; microchips; microprocessors; computer network hubs, switches and routers; computer displays and terminals; computer whiteboards; system boards and processors; industrial process controller featuring call control, operator interface, gage interfaces, and data collectors; manufacturing execution systems and document management software; digital signal processing products and systems, namely, industrial automation controls and programmable logic controllers; controllers of machine tools, namely, an adaptive control product in the nature of an external controller to optimize machine tool cutting performance of rough and semi-rough cuts; power supplies and mounting hardware; intrusion and burglar alarm systems; security devices, namely, programming logic computers, control panels, electronic intrusion detectors, electronic glass-break sensors, electronic vibration sensors, magnetic contacts for use in security systems, electronic switch plates, electronic motion sensors for alarm systems, electronic motion sensitive switches, hardwire sirens, audio speakers, electronic speaker drivers, access control and alarm monitoring systems; fire, heat, and smoke detecting and alarm units; computer card operated access control systems; card readers, card encoders, and encoded cards for use with card operated access control systems; video cameras; video object recognizers; video object trackers; video license plate readers; video alarm verifiers; video face recognizers; video vehicle recognizers; video traffic detectors; video access door controllers; video intrusion detectors; processing hardware and software that analyzes digital video images to automatically extract, record, and report intelligence; remote video monitoring systems for security and surveillance applications; central video monitors; cameras; short range wireless radio frequency transceivers; power line transceivers; communication control hardware, namely, keypad controllers, matrix switchers, multiplexes, digital video recorders, integrated pan-tilt-zoom domes, remote video controllers, electronic alarms, and management controls and triggers; video transmission devices in the nature of video transmitters sold separately or as part of a system for operating closed circuit cameras; fiber-optic transmission systems, namely, fiber optic transmitters, receivers, and transceivers used in the transmission of video, audio, and data signals over

optical fiber; electro-mechanical locks; magnetic locks; electric keys; handheld electronic hardware, namely, handheld programmable units and handheld computers for receiving, controlling, storing, manipulating, displaying, transmitting data and for operating electronic locks; electronic key fobs and readers and encoders therefor; access keypads; radio frequency tracking tags; tracking and control system comprising one or more radio frequency tags, transceivers, and sensors used to determine and monitor the location and movement of tangible assets, of inventory, and of individuals; infrared sensors; computer hardware and software for facilities management and controlling facility access systems and components therefor, namely, control panels, access card readers, and equipment and systems for video imaging, video monitoring, digital hard drive recording, network transmission and remote access; networked digital video storage servers for access control and surveillance applications, for alarm monitoring applications, and for security applications; computer software and hardware for controlling and operating security and access system comprising locks, doors, and access and identification; devices and security enclosures in the nature of electronic boxes, namely, safes for securing keys; surveillance equipment sold individually as components or together as a system comprising one or more surveillance cameras, covert cameras, close circuit television cameras, camera housings, camera mounts, camera lenses, video monitors, video recorders, digital recorders, video storage media, video switches, control panels, keypad controllers, joystick controllers, transceivers, receivers, transmitters, signal processors, multiplexers, matrix switches, controllers, control panel housing, switch housing, transformer switches, splitters, coaxial cables, connectors, motion detectors, microphones, and speakers; computer user interface software and control software for managing security, fire, and access systems; hand-held electronic computer and communication hardware for receiving, controlling, storing, manipulating, displaying and transmitting data for operating electronic locks; pre-recorded magnetic data carriers featuring identification and security information; data processing software and computer hardware; siren speakers and electronic siren drivers, namely, tone generators and amplifiers adapted to be used for sirens; switch units incorporating magnetically actuated reed switches for use in burglary and fire sensing alarm systems, in industrial position sensing apparatus, in revolution counters, in equipment cabinet safety interlock systems, in industrial position controlling apparatus, in electrical cables and in pump and valve controlling apparatus and in home security alarm systems; time or condition sensing apparatus for initiating and controlling regeneration or backwash cycles for water treatment equipment; bioreactors for culturing cells; portable analytical instruments, namely, probes with a microprocessor based data conversion logger for measurement of organic and inorganic chemicals in water; filters and filter housings for laboratory use; fluid separation apparatus for laboratory use; membrane filters for laboratory use; silt density measuring device; deionization units for laboratory use; fluid flow control devices, namely, pumps, valves, flow meters, and regulators for laboratory use; ozone monitors; laboratory equipment, namely, porous microtiter plates for use in cell biology and other life science applications; electronic water and process treatment controls, namely, apparatus for use in the treatment of commercial and industrial water systems, boiler water systems, cooling water systems, closed water systems, fuel processing systems, and metal processing systems to analyze the chemistry of the system, determine the proper treatment program, apply the desired treatment, and monitor the effectiveness of the treatment; computer software for data management in the water treatment field; electronic controllers used for processing information in the water treatment field;

apparatus for use in industrial water systems to measure and control ph and conductivity; electronic apparatus for feeding chemicals to an industrial, commercial, or municipal water system in measured amounts; laboratory testing equipment, namely, deposition and corrosion rate testers; mobile laboratory equipped with equipment and instrumentation to monitor and measure ph, conductivity, and chromatic concentration of industrial and domestic waters, to conduct inorganic and microbiological analysis of water; avionic sensor systems, namely, navigation systems; battery chargers; computer hardware and software for use with medical patient monitoring equipment, and for receiving, processing, transmitting and displaying data; computer software for accessing information directories that may be downloaded from the global computer network; computer software for controlling and managing patient medical information; electric control devices for heating and energy management; electrical apparatus, namely, charging stations for charging electric vehicles; electronic signaling mechanism, namely, a train control system used in the railway industry for detecting and controlling trains, ground faults, broken rails, power failures, track switches and lights; electronic sensors for monitoring energy utilization, temperature, position, distance, speed, and acceleration; electrical substations comprised of transformers, circuit breakers, circuit switchers, voltage regulators, fuses, capacitors, relays, rectifiers, and electric power converters; power inverters; electronic control devices for energy management; electronic automation products, namely, electrical routers and electrical hubs; computer software and hardware for the management, distribution, monitoring, and control of energy; automation systems, namely, computer software and hardware and communications devices for planning, scheduling, controlling, monitoring, and providing information on transportation assets and parts thereof; automation systems, namely, computer hardware for embedded operating systems and pc based computer software, for monitoring specified conditions and controlling respective innovative devices within a designated area; computer hardware and software systems for automated train control and traffic supervision, namely, location tracking, vehicle monitoring, vehicle controlling, dispatching, signaling, communication, and data transmission; computer software for management of railway networks; wireless communication devices for voice, data, or image transmission; traffic management equipment, namely, display monitors, computers, auto compasses, and software to manage traffic; computer software for interfacing and interacting with remote control locomotives and locomotive hardware; led traffic and rail signals; electronic fuel level gauges; automated fuel station management systems comprising of computer operating software, metered fuel pumps, rate control panels, fuel lines, and dispensing nozzles for fueling land, marine or aircraft vehicles; gas meters; electrical and scientific apparatus, namely, general-purpose high-precision electric computer-controlled valves for use in high-precision flow applications; optical imaging apparatus; microscopes and high accuracy electro-mechanical actuators; automated dna optical scanners; automated microscopy systems comprising microscopes, computer hardware, and software; electromechanical hardware and software systems comprising of computers, computer software, electromechanical positioners for micro-positioning control, all for use in the field of photonics, digital flow control, analysis of biological samples, semiconductor testing and inspection, microscopy, optical scanning, and in the field of scanning systems for lasers; computer software for microscopy, imaging, and informatics in the field of clinical and diagnostic testing; electric actuators; electric valve actuators; precision positioning systems comprised of optical indexers, namely, an optical train with a camera and a filter wheel

that enables image data to be digitized, microscopy stages, electronic control circuitry, motion control chassis, linear actuators, screw actuators, linear sliders, electric motors, and tunable lasers for digitizing images in the fields of photonics, bio-medical imaging, fluidics, mass flow valves, life sciences, semiconductor manufacturing, and clinical diagnostics; modular biologics manufacturing system used for growing, purifying, concentrating, isolating, and packaging biological materials in chemical, of a bioreactor used to grow cell cultures and biological products, a separation machine used for isolating, purifying, and concentrating biological materials, and connecting computer hardware and software; computer hardware and software for use in industrial processing plants and refineries in the chemical, petrochemical, and processing industries.

- Klasse 10 Medical specimen collection vials; medical cannulas; medical syringes; injection devices for pharmaceuticals; disposable cartridges for holding and transferring encapsulated radioisotope brachytherapy sources for use in treating prostate and other cancers; pre-filled cartridges containing contrast media for medical imaging; infusion pumps for intravenous administration of fluids; implantable radiation therapy devices consisting of encapsulated radioisotope brachytherapy sources for use in treating prostate and other cancers; radiation therapy delivery system consisting of radioactive seeds and a bio-absorbable carrier assembly; cardiac output monitors; bacteria filters for medical use; gas analyzers for medical purposes; anesthesia record keeping and data management systems; patient monitoring systems, namely, gas monitors, pulse oximeters, multi-parameter monitors, ECG monitors, invasive and non-invasive blood pressure monitors, neuromuscular transmission monitors, metabolic monitors, and spirometers for anesthesia, intensive care, and diagnostic applications; anesthesia machines and ventilators; intensive care and anesthesia accessories for single patient use, namely, gas sampling lines, airway adapters, breathing circuits, spirometry sensors, tubes, water traps, pulse oximetry sensors, non-invasive blood pressure cuffs, intravenous flushing sets, anesthesia masks, carbon dioxide absorbers, temperature probes, and nebulizers; central nervous system monitors; gastrointestinal tonometers; gradient coils, namely, magnetic gradient coils used in magnetic resonance imaging; medical diagnostic devices, namely, bone densitometers; fetal monitoring apparatus, namely, fetal pulse and vital signs monitor; patient monitoring apparatus, namely, heart and vital signs monitor; medical imaging systems, namely, ultrasounds, medical diagnostic imaging machines, imaging devices for screening and diagnostic applications for use in planning intervention and surgery, and parts thereof and attachments thereto; blood glucose monitors, analyzers, and meters; blood glucose monitoring combination kits comprised of lancets, control solution, and test strips all sold as a unit; medical diagnostic apparatus for displaying diagnostic images, namely, spot film apparatus, x-ray fluoroscopes, mobile x-ray units, computerized tomography scanners, nuclear resonance scanners, ultra sound scanners, magnetic resonance scanners, positron emission tomography (PET)scanners, and parts thereof and attachments thereto including tables and pads; incubators for babies; warming device for stabilizing infant body temperature for medical purposes; medical devices, namely pressure regulating valves; medical apparatus and instruments, namely, medical respiratory apparatus to enhance breathing; sleep screening apparatus and accessories thereto for use with medical respiratory apparatus and with sleep monitoring devices, namely remote controls, remote alarms, and nasal masks; medical apparatus for intravenous administration of fluids namely fluid warmers; medical apparatus and surgical devices, namely face masks, breathing circuits, manual resuscitators, pressure infusers, laryngoscopes,

anesthesia systems comprised of hoses, breathing bags, and Y-elbow fittings.

- Klasse 11 Heat exchangers not being parts of machines; chemical heavy wall reactors, nuclear reactors, and accessories and component parts thereof, namely, heat pumps, steam valves and valves for regulating the flow of gases and liquids; electric lamps of all kinds and their parts; electric lighting fixtures and their parts; electric refrigerators, freezers, air conditioning apparatus, dehumidifiers; electric ovens, and ranges; microwave ovens for cooking; wall cooking ovens for domestic use; food warming drawers; electric and gas cook tops; gas cooking ovens and ranges; ventilation hoods for stoves; ventilating exhaust fans; water filters; water softening units; clothes dryers; electric fans; ceiling fans; flashlights; lamps and lights for vehicles; electric lights for christmas trees; fluid separation units for industrial use in a wide variety of industries; fluid concentration units for industrial use in a wide variety of industries; fluid recycling units for industrial use in a wide variety of industries; filter apparatus used for filtering solids from gases and liquids or filtering liquids from gases, or for filtering one immiscible liquid from another for industrial use in a wide variety of industries; spirally-wound elements or cartridges contained within a tubular plastic sleeve for concentrating products and removing impurities in fluid treatment systems for industrial use in a wide variety of industries; water conditioning units for residential purposes; reverse osmosis modules and membranes therefore for industrial use in a wide variety of industries; water purification units and systems consisting of clarifiers, electro-deionization systems, condensate polishers, vacuum degasification units, ultra filtration units, ultraviolet sterilizers, ion exchangers, caustic regeneration systems, reverse osmosis systems, forced draft decarbonator units, filters, chemical feed systems, and bulk storage units, sold with automatic controls and instruments to monitor operating parameters of the units and systems electrochemical liquid purification units for use in the industrial, commercial, and municipal sectors; domestic electric and gas cooking appliances, namely, cooking rings, gas and electric stoves; gas and electric ovens and cooktops; electric coffee makers for domestic use; electric coffee percolators; electric tea makers and component parts; electric toasters; electric toaster ovens; electric cooking crockery cookers and casserole dishes; electric hot plates; electric deep fryers; domestic electric frying pans; domestic electric rotisserie ovens; electric hot air cooking ovens for domestic use; electric roaster ovens; electric waffle irons; electric kettles; electric radiant heaters; humidifiers; LED and HID light fixtures; led luminaires; water heaters; filter cartridges for the filtration of potable water; control valves for water conditioning and water filtration equipment.
- Klasse 12 Electric motors and diesel engines for land vehicles; locomotives and engines for land vehicles; airplane propellers; railway bogies; railway cars; railway couplings; screw propellers for vehicles; torque converters for land vehicles; vehicle propellers.
- Klasse 35 Inventory control services; consultation in the field of inventory control services; acquisition integration services; business reorganization consulting services; truck and automobile fleet management services, namely, voyage reporting and invoicing via a global computer network; consultation in the field of truck and automobile fleet management services; business administration consulting services; consultation in the field of operation and management of power plants; supply chain management and consulting services in the areas of chemical product and service sourcing, and procurement, product inventory and supply management and cost containment; consulting, marketing, cost and pricing analysis relating to electrochemical liquid purification units for use in the industrial sector; business consulting and information services.

- Klasse 36 Asset based and private label financing services; financial analysis and consultation; credit card financial services; credit card services, namely, extension of credit to others; financial asset management for others; equity investment services; personal loan financing; mortgage banking services; acquisition financing services; commercial financing services; commercial real estate agency services; mutual fund investment; private equity and debt investment; consultancy, advisory and information services relating to all the foregoing services.
- Klasse 37 Consulting in the field of building construction; construction, installation, repair, replacement, overhaul, and maintenance of power plants, engines, turbines, wind turbines, motors, and apparatus, equipment and instruments for the generation of power and electricity and their component parts and fittings and accessories; remote monitoring and diagnostic repair and maintenance services rendered in the repair and maintenance of aircraft engines including accessories and component parts, turbines including accessories and component parts, electrical equipment, medical equipment, and locomotives including accessories and component parts; chemical cleaning services for glass-lined reactor vessels used in the chemical and pharmaceutical processing industries; maintenance services for heat transfer systems and condensers; maintenance and repair services in the field of computerized cooling system equipment; installation, maintenance, and repair of equipment and systems in the field transportation and traffic control; maintenance and/or repair of traffic control equipment; technical support services, namely, technical advice related to the installation and repair of advanced train control and traffic supervision systems and subsystems.
- Klasse 40 Water and wastewater treatment services; water treatment services, namely, desalination, purification, conditioning, cleaning of ion exchange resins, identifying and controlling of microbiological organisms; membrane regeneration services; chemical control system services relating to the feeding of treatment chemicals to industrial water systems; consulting services in the fields of water treatment for aqueous systems, cooling water systems, industrial boiler water systems, industrial water and process systems; consulting services in the fields of industrial fuel processing system treatment, and metal and plastic processing system treatment; providing information to others, over a global computer network, relating to industrial water purification systems; custom manufacture in the field of biotechnology and pharmaceuticals.
- Klasse 41 Educational services in the field of medical imaging and diagnostics, namely, holding seminars, conferences, symposiums or workshops relating to the pharmaceutical industry for medical practitioners and employees of pharmaceutical companies; educational services, namely, holding seminars, conferences, symposiums or workshops in the field of life science and biotechnology for scientists and researchers; conducting seminars related to industrial water treatment problems; providing training services for all the aforesaid; training in the use and operation of signaling and crossing-warning systems for the rail and transit industries; providing training services in management and the medical field through the use of instructions and demonstrations provided online, through the internet, intranet, or extranets; education services, namely, conducting practical training workshops, classes, and seminars, featuring demonstrations in the fields of management and medicine.

Foretaksnavnet som er krevet overprøvd: BRING OMAR, org.nr. 919 349 026.

Kravet ble mottatt av Patentstyret: 2017.07.28

Innehaver: BRING OMAR, Dælenenggata 39 B, 0567 OSLO

Kravstiller: Posten Norge AS, Biskop Gunnerus' gate 14A, 0185 OSLO

Grunnlag: Kravet er begrunnet med at foretaksnavnet BRING OMAR er egnet til å forveksles med kravstillerens eldre varemerkeregistrering nr. 264752, ordmerket BRING, varemerkeregistrering nr. 242744, ordmerket BRING GROUP, og varemerkeregistrering nr. 264653, det kombinerte merket BRING, jf. foretaksnavneloven § 2–6 nr. 4.

Beslutning: Registreringen av foretaksnavnet BRING OMAR er i strid med foretaksnavneloven § 2–6 nr. 4, og kravet om administrativ overprøving tas til følge.

Krav nummer: OP 2018/00070

Foretaksnavnet som er krevet overprøvd: ACCOUNTIT AS, org.nr.: 920029582

Kravet ble mottatt av Patentstyret: 2018.02.15

Innehaver: ACCOUNTIT AS , Øvre Slottsgate 15 B, 0157, OSLO, NO

Kravstiller: ACCOUNT IT AS , Karl Johans gate 8, 0154 OSLO

Grunnlag: Kravet om opphevelse er begrunnet med at det registrerte foretaksnavnet ACCOUNTIT AS er egnet til å forveksles med kravstillerens foretaksnavn ACCOUNT IT AS, med organisasjonsnummer 914 277 574, og at foretaksnavnet derfor er registrert i strid med foretaksnavneloven § 2–6 nr. 4.

Beslutning: Registreringen av foretaksnavnet ACCOUNTIT AS er ikke i strid med foretaksnavneloven § 2–6 nr. 4, og kravet om administrativ overprøving tas ikke til følge.
