Class 30: Unprocessed grain, in particular rice.

5. The characteristics of the goods to be certified by the EU certification mark

The applicant and proprietor SRP are a global multi-stakeholder alliance launched in 2011 and led by UN Environment Programme, the International Rice Research Institute (IRRI), and GIZ, comprising over 100 institutional stakeholders including public and private sector organizations, research, financial institutions and NGOs. SRP promotes resource-use efficiency and climate change resilience in rice systems and pursues voluntary market transformation initiatives by developing sustainable production standards, indicators, incentives and outreach mechanisms to boost wide-scale adaption of sustainable best practices throughout rice value chains. SRP's goal is to minimize environmental impacts of rice production and consumption while enhancing livelihoods of small farmers and contributing to food security and climate change resilience.

The certification logo provides an on-pack verification that the product has been produced using climate-smart, sustainable best practices, in compliance with the SRP Standard for Sustainable Rice Cultivation (Annex 1),

The SRP Standard covers all farm-level processes in rice production, including postharvest processes under the farmer's control. A total of 46 requirements are structured under the following 8 themes, following the rice growing season:

1. Farm management
 - crop calendar
 - record keeping
 - training
2. Pre-planting
 - heavy metals
 - soil salinity
 - land conversion and biodiversity
 - invasive species
 - levelling
 - pure seed quality
3. Water use
 - water management
 - irrigation system at community level
 - inbound water quality
 - groundwater extraction
 - drainage
4. Nutrient management
 - nutrient management (organic and/or inorganic)
 - organic fertilizer choice
 - inorganic fertilizer choice
5. Integrated pest management
 - weeds
 - insects
 - diseases
 - molluscs
 - rodents
 - birds
6. Harvest and postharvest
 - timing of harvest

SRP also measures the impact of adoption of best farm practice using a set of Performance Indicators (Annex 2). These indicators allow benefits to the farmer, environment and climate to be monitored and assessed against the UN Sustainable Development Goals (SDGs).

6. Conditions governing use of the EU certification mark, including sanctions

SRP permits use of the certification mark on product packaging by supply chain actors (e.g. producers or retailers), subject to compliance with the conditions and processes set out under the SRP Assurance Scheme (Annex 3), which is overseen on SRP's behalf by GLOBALG.A.P., based in Cologne, Germany.

The Assurance Scheme offers three levels of assurance, of which only the most stringent (Level 3, Annex 3, pages 20-23) allows on-pack use of the certification mark. Assurance levels 1 and 2 are not certificated and no logo or claim is permitted. Level 1 and 2 only help promote adoption of sustainable best practice by small farmers and puts them on the path towards the full compliance of level 3.

The Assurance Scheme provides a robust, transparent, accountable and credible governance framework for assessing compliance under the SRP Standard using independent, accredited third party auditors to conduct farm audits to verify farmers' practices and compliance with the SRP Standard. The Assurance Scheme follows best-practice guidance issued by the ISEAL Alliance, the global membership organization for credible sustainability standards.

The requirements, endorsed usage, restrictions and prohibitions are set out in the SRP Communications and Claims/Logo Guide (Annex 3, page 28 and Annex 3, pages 47-53). On page 28 of Annex 3, the term "licensee" is obviously not meant technically, but, in the meaning of user, as mentioned in this regulation of use and all annexes.

Any use of the certification mark, including any claim referring to the SRP Standard, must be in accordance with these provisions.

SRP only grants the respective producer, producer group or supply chain partner the non-transferable and non-sublicensable right to use the SRP Claims and certification mark in accordance with the relevant terms and provisions of the SRP Assurance Scheme and the SRP Communications and Claims/Logo Guide (Annex 3, see above). The rights granted to the user under this section are

- subject to
 - (i) verification of the users' compliance under the provisions of the SRP Assurance Scheme (including Chain of Custody requirements) and
 - (ii) users' SRP membership; and
- strictly limited to
 - (i) the level 3 (3rd party verification) assurance and compliance fulfilled by the user (mass balance, product segregation and identity preservation) and
 - (ii) the specific forms of usage as defined in the SRP Communications and Claims/Logo Guide (Annex 3, see above).

Producers or producer groups who have demonstrated through third party audit by an inspector from an accredited Verification Body (VB; Annex 3, page 39-43) that they meet the requirements of the Standard are issued with a verification certificate, valid for 12 months from date of the verification decision (date of approval by the VB review). Producer or producer groups under verification must renew their verification status annually. There exists a minimum period of eight months between two inspections for renewal. VB may use these 8-month inspection window to carry out a re-assessment (Annex 3, page 20-23).

The Assurance Scheme specifies sanctions applicable in the event of misrepresentation, fraud or failure to comply with the provisions specified for certification mark usage. SRP is entitled to revoke the rights granted under this section (Annex 3, page 28) at any time in written form if the use of the granted rights

- (i) violates legal requirements or rights of third parties or
- (ii) is likely to have a negative impact on the reputation of SRP or the SRP Claims and/or Logos.

The user is responsible for ensuring that its use of the SRP Claims and/or certification mark does not violate applicable laws and/or further applicable regulations.

7. Persons authorized to use the EU certification mark

Any supply chain actor (producer, producer groups, retailer) meeting the required standard as specified in points 5 and 6 above, is entitled to use the EU certification mark.

End users of the certification mark need not be SRP members; however, use of the SRP certification mark must follow the SRP Communications and Claims/Logo Guide (Annex 3, page 47-53, see above).

The applicable fees for using the EU certification mark (annual membership dues, trading fees and system fees) are listed in Annex 3, page 8 and 45.

8. How will the certifying body test these characteristics and supervise proper use of the EU certification mark?

Operation of the Assurance Scheme is overseen by GLOBALG.A.P., which ensures integrity in audits as well as consistent scoring across countries and auditors. GLOBALG.A.P.'s Integrity Program includes a number of measures to uphold brand integrity, including auditor training, unannounced audits, shadow audits, a grievance and complaints programme and an appeal process. The GLOBALG.A.P. / SRP database tracks volumes through the supply chain, flagging unusual or contradictory data for further investigation.

The products are examined by an external, independent verification body (VB) with no link with the producer or producer group. Such third-party verification may be done by inspection bodies and certification bodies approved as SRP Verification Bodies by the trademark proprietor. To reach compliance and be eligible to use the certification mark, producers or producer groups must have achieved a score of at least 90% against the SRP Standard (Annex 1, pages 6-8), as well as compliance with all mandatory thresholds specified in the Standard.

The conditions for third-party verification are listed in Annex 3, pages 20-23 see above.

Producers or producer groups under verification must apply every year to the VB in order to renew their verifications. There shall be a minimum period of eight months between two inspections for renewal. The certification mark deals with the production of a mostly seasonal product and will therefore require flexibility in audit timing, VBs may use inspection windows of eight months around the verification date to carry out the re-assessments.
