Internasjonale varemerkeregistreringer

Internasjonale varemerkeregistreringer som gjelder for Norge ved utpekning etter Madridprotokollen. Innsigelsesperioden utløper 3 mnd. fra kunngjøringsdato, jf. varemerkeloven § 71.

- Generell informasjon om kunngjøringer etter Madridprotokollen**
- Int.reg.nr.:** Det vil si det internasjonale registreringsnummer som WIPO har gitt søknaden om internasjonal registrering.
- Int.reg.dato:** Det vil si den dato en internasjonal registrering anses for å ha skjedd, jf. varemerkeloven § 72 og Madrid-protokollen artikkel 3 (4).
Dersom den internasjonale registreringen besluttet gjeldende i Norge, vil registreringsperioden på 10 år regnes fra den internasjonale registreringsdatoen.
- Etterfølgende utpekingsdato:** Det vil si datoen for rettsvern i Norge hvor utpekingen ikke har skjedd i forbindelse med den internasjonale registreringen.
- Prioritet:** Internasjonale søknader kan påberope seg prioritet etter Pariskonvensjonen artikkel 4 fra det land merket først ble søkt registrert. Dette vil ofte være søkers hjemland idet en internasjonal registrering må bygge på en hjemlands-registrering eller -søknad.
- Besluttet gjeldende dato i Norge:** Det vil si den datoen det innføres i varemerkeregisteret at den internasjonale registreringen gjelder i Norge, jf. varemerkeloven § 70.

Klasse 1 Chemicals used in industry and science being powders or dispersions for the generative manufacturing of parts, prototypes, models, profiles and tools, and other types of three-dimensional objects, in particular by laser sintering, laser melting, electron beam sintering and electron beam melting; chemicals, namely coating materials and thin layers of organic and inorganic materials for applying a coating to substrates including metal, glass, ceramic and plastic; organometallic chemical compounds; coating materials (other than paints) of metallic materials, metal alloys and dispersions, and layers and layer sequences made therefrom, in particular surface layers on workpieces, tools and machine parts; ceramic glazings for use in additive manufacturing; foundry sand for use in additive manufacturing; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields; welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.

Klasse 5 Organic materials for use in additive manufacturing, namely implantable materials for use in guided tissue regeneration; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields; welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparel, welding accessories, welding flux, cutting products.

Klasse 6 Metal powders, metal alloys and dispersions mainly of metals, metal mixtures, alloys and mixtures of metals or alloys, all for the additive manufacturing of parts,

prototypes, models, profiles and tools, and other types of three-dimensional objects, in particular by laser sintering, laser melting, electron beam sintering and electron beam melting; coating materials of metal, namely pure metal coating powders, alloyed coating powders, coating powder mixtures, solid coating materials in the form of wires or panels, consisting of pure metal or metal alloys; metal powders for 3D printers; coating materials of metallic materials, metal alloys and dispersions, and layers and layer sequences made therefrom, in particular surface layers on workpieces, tools and machine parts; metals for additive manufacturing; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields; welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparatus, welding accessories, welding flux, cutting products.

Klasse 7 3D printers; machines, machine parts and spark plug ignition wires for additive manufacturing, in particular by means of VAT polymerisation, material jetting, 3D printing, material extrusion, powder bed fusion (including, but not limited to laser sintering, laser melting, electron beam sintering, thermal sintering and electron beam melting), sheet lamination and directed energy deposition (DED); all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields; welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparatus, welding accessories, welding flux, cutting products.

Klasse 17 Photopolymer resins for additive manufacturing; polymers for additive manufacturing; plastics for additive manufacturing; thermoplastics for additive manufacturing; thermosetting plastics for additive manufacturing; all the aforementioned goods of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields; welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparatus, welding accessories, welding flux, cutting products.

Klasse 40 Custom manufacturing and production of 3D printed objects; material processing, namely by 3D printing; rental of 3D printers; custom additive manufacturing of parts, workpieces, prototypes, models, profiles, tools and other types of three-dimensional objects from powders, wires and dispersions, especially by VAT polymerisation, material jetting, 3D printing, material extrusion, powder bed fusion (including, but not limited to, laser sintering, laser melting, electron beam sintering, thermal sintering and electron beam melting), sheet lamination and DED (directed energy deposition); processing of materials and custom additive manufacturing, especially via VAT polymerisation, material jetting, 3D printing, material extrusion, powder bed fusion (including, but not limited to laser sintering, laser melting, electron beam sintering, thermal sintering and electron beam melting), sheet lamination and directed energy deposition (DED); coating workpieces, manufactured parts, material webs, tools and machine parts of metal, ceramic, plastic, fibre-reinforced plastics, in particular applying layers of metallic materials, ceramic materials, plastic and composite materials of two or more thereof, custom manufacturing and processing of parts, prototypes, models, profiles and tools and other types of three-dimensional objects by generative manufacturing; custom manufacturing of powders for the generative manufacturing of three-dimensional objects, in particular by laser sintering, laser melting, electron beam sintering or electron beam melting; application of functional protective layers on workpieces, finished parts, material webs, tools and machine parts, including pre- and post-treatment

processes; all the aforementioned services of this class - apart from the fields of thermal spray, mechanical cutting and/or additive and build-up manufacturing which are not subject to any restrictions - not in the following fields; welding, brazing, laser cladding, hardfacing, welding equipment, welding consumables, welding apparatus, welding accessories, welding flux, cutting products.

 transportation and vehicle management; magnetic
 cards, magnetic identification cards; smart cards and
 microprocessor cards; electronic location and global
 positioning systems; system for the geolocation and for
 the recognition of positions or for the recognition of
 passages; electronic satellite geotracking apparatus
 and instruments for geolocation, known as GPS or
 GPS-GPRS; telematic (data transmission) and GPS-
 vehicle locating systems for the localisation of vehicles
 in real time and for the transmission of data of vehicle
 use and vehicle handling; non-voice telecommunication
 apparatus and instruments for the transmission of data

over short distances between road systems and mobile units; data cards for third generation cellular telephone networks; GSM (Global System for Mobile Communication) data cards, data cards compatible with the broadband wireless telephone standard GPRS (General Packet Radio Services); apparatus for recording, transmission and reproduction of sound and images; computer software and software for the traffic management on roads and motorways, for the toll management and for the creation of road itineraries/routes; computer software; measuring, detecting and monitoring instruments and devices; acceleration sensors for the measurement of the speed-up behaviour and braking characteristics, also independently of the geo positioning; electronic transmitting and receiving equipment [on-board units] for use on toll roads; radio and telecommunications equipment, as well as equipment for navigation, direction finding and localization; transmitters, transceivers; audio and video receivers; antennas; sensors; control and monitoring equipment; satellite navigation instalments; equipment for recording and measuring distances; data processing equipment and computers; communication equipment; programmed machine-readable data carriers of all kinds; navigation equipment for vehicles (on-board computers); mobile apps; application software for mobile devices, for mobile operating systems, for navigation devices, for smartphones, for wireless devices, for cloud computing services; application software for mobile devices with traffic light systems for displaying current and forecast fuel prices; apps for evaluating petrol stations; apps for individual conditions in transport and vehicle management and for the display of petrol station networks; apps for the creation of road itineraries/routes; apps for the display of driving styles in the areas of braking, speed, acceleration and cruise control; smartphones, computers; parts of all the aforementioned goods [included in Class 9].

Klasse 12 Vehicle parts, parts and accessories for vehicles as far as not included in other classes.

Klasse 35 Computer based preparation and balancing of invoices of fees for frontier-clearance (office functions); computer based preparation of invoices of cargo and cargo procurement costs (office functions); arrangement of contracts for the assignment of access authorizations for toll lanes and tunnels through the arrangement of contracts for the purchase and sale of vignettes and the input of data in data processing equipment (office functions); computer based preparation of invoices of tunnel fees (office functions); computer based preparation of invoices of repair services (office functions); computer based preparation of invoices of fuels (office functions); processing of foreign value-added-mineral-oil-tax return service in different countries (office functions); preparation and balancing of invoices (billing) (within the scope of cashless payment transactions), based mainly on customer-oriented and developed software programs, computer-aided billing (within the scope of cashless payment transactions) and billing management for fuel, ferry fees, motorway fees, toll fees and/or value-added tax; customer invoicing, for others; accident services, namely procurement of contracts for others for replacement vehicles and two vehicles as well as towing services; price comparison services, in particular provision of information relating to the price of fuels at home and abroad; business management; business administration; office functions; accounting services; auditing; advertising; recording of personal- and vehicle-related data (office functions); office functions, namely computer based compilation and processing by preparation of statistics and statistical analysis of vehicle master data, of tank data invoices, of motor vehicle costs and revenues; office functions, namely computer based order planning including systematically capture of data and capture and planning both in terms of organization and business planning of motor vehicles and orders; address administration; vehicle fleet

management; consumer information, namely providing of information and advice for consumers in matters of cashless in-transit supply in the field of goods and passenger transport; office functions, namely compilation of information and setting up notification functions to send automated reports; advertising in the field of toll collection and transport infrastructure; price comparison services, in particular provision of information relating to the price of fuels at home and abroad; execution, organization, management and monitoring of incentive schemes; organization and management of customer loyalty schemes including for commercial, promotional and advertising purposes; evaluation of companies (filling stations); benchmarking services; compilation of different filling station services and fuel offers, for others, to facilitate the comparison and purchase of these services; data entry and data processing (collection, systemization, updating and maintenance of data) in computer data bases (office functions); arranging radio mobile services.

Klasse 36 Issue of service cards with payment function to industrial freight and passenger transport businesses for the cashless in-transit supplying of automobiles, heavy trucks, busses and their drivers; computer based (aided) settlement of finance transactions/-deals, with service cards with payment function; services in the field of the cashless in-transit provisioning of nationally and internationally-active businesses involved in industrial goods and passenger transport, of commercial vehicle fleets of passenger vehicles and/or lorries, and in the transport sector, namely preparation and balancing of invoices (billing) (within the scope of cashless payment transactions), based mainly on customer-oriented and developed software programs, computer-aided billing (within the scope of cashless payment transactions) and billing management for fuel, ferry fees, motorway fees, toll fees and/or value-added tax; electronic processing of foreign value-added-mineral-oil-tax return service; conducting cashless payment transactions in the field of payment of road toll fees and other road fees; debt collection; handling electronic payment transactions; services for payment processing via service cards, in particular concluding contracts with toll plazas; frontier-clearance and ferry services, for access entitlement to toll roads and tunnels (customs clearance for others); collecting utilization fees by the issue of vignettes; issue of vignettes; preparation of financial damage reports.

Klasse 37 Services of a motor vehicle repair workshop; service station services and its sales and services businesses relating thereto, namely cleaning of motor vehicles, repair of motor vehicles; breakdown assistance, namely repair of motor vehicles on site and at motor vehicle repair shops; maintenance of motor vehicles; repair of tyres and motor vehicle cooling systems; maintenance of tyres and motor vehicle cooling systems; operation of a multilingual breakdown service via a hotline on the Internet, namely advice from motor vehicle specialists on repairing vehicle breakdowns; installation of toll logging and toll billing equipment; maintenance of toll logging and toll billing equipment; installation and maintenance of units equipped with a system for geo localisation and position recognition or for recognition of passages; installation and maintenance of electronic satellite geo tracking apparatus and instruments, known as GPS or GPS-GPRS; installation and maintenance of tele matic (data transmission) and GPS-vehicle locating systems for the localisation of vehicles in real time and for the transmission of data of vehicle use and vehicle handling; installation and maintenance of non-voice telecommunication apparatus and instruments for the transmission of data over short distances between road systems and mobile units; installation and maintenance of apparatus for recording, transmission and reproduction of sound and images, installation and maintenance of electronic transmitting and receiving equipment [on-board units] for use on toll roads; installation, repair and maintenance of radio and telecommunications equipment as well as equipment

- for navigation, direction finding and localization, transmitters, transceivers, receivers, antennas, sensors, control and monitoring equipment; operation of a multilingual breakdown service via a hotline on the Internet, namely advice from motor vehicle specialists on repairing vehicle breakdowns.
- Klasse 38 Telecommunications (telecommunications services) including radio services, namely radio guidance of motor vehicles in industrial freight and commercial passenger transportation; provision of multilingual breakdown services, namely procurement of access to technical expertise with regard to roadside assistance via the Internet; providing access to and transmission of messages, data and information on the Internet; telecommunication services for nationally and internationally operating industrial freight and commercial passenger transport services, namely the transmission of information about the state of roads, the traffic situation, the location of service stations, the location of vehicles, technical vehicle matters, the price of fuel at home and abroad via the Internet and radio services; transmission of information via computer servers, data transmission services with free access; transmission and exchange of information via multimedia carriers; telecommunications services for the delocalisation; access providing services to a worldwide computer network; connection by telecommunication to a worldwide computer network; IT services, namely installation of notification functions and delivery (transmission) of automated reports, namely E-Mail-services; rental of telecommunications equipment for the transmission of messages and On-Board-Units; professional consultancy on the field of telecommunications, in particular with regard to delocalisation installations in connection with traffic conditions on road and motorway networks and with regard to On-Board-Units; telecommunications services for remote access to On-Board-Units for the purpose of updating and/or extending the personalization data.
- Klasse 39 Rental of construction vehicles and other special-purpose vehicles; tracking of passenger or freight vehicles by computer or via GPS (transport information); vehicle breakdown services, namely vehicle towing and rescue services; automobile towing services; car rental; rental services, namely rental of busses and vehicles for the freight forwarding sector; transport of motor vehicles by rail; rolling road (intermodal transportation), namely transport systems whether or not accompanied for the combined railway traffic, namely transport of complete trucks or semi-tractor trailers by rail; packaging of goods; storage of goods; travel arrangements; transshipment of transport goods; information services for the nationally and internationally operating industrial freight and commercial passenger transport services, about the state of roads, the traffic situation, the location of service stations, the location of vehicles, technical vehicle matters; location of broken-down goods vehicles with computers through computer-aided map systems; car navigation systems (road guidance systems) via services of mobile radiotelephony, namely controlling of fleet vehicles using electronic navigational and positioning apparatus as well as via radio services; transport services, in particular freight forwarding, except the customs clearance of goods; provision of information, namely with city, travel and traffic information; delivery of teleshopping offers for others; booking of travel; parking space search service [provision of information on the availability and location of parking spaces, display of free parking spaces using electronic navigation and positioning devices]; itinerary travel advice services; freight forwarding, namely customs clearance for others.
- Klasse 41 Provision of multilingual breakdown services, namely interpreting services; ticket procurement services; organization of contests; coaching with the goal of increasing the motivation of the users, operators.
- Klasse 42 Installation and maintenance of software for toll registration and toll invoicing devices as well as for systems for the global positioning and position recognition or recognition of passages, for electronic satellite geotracking apparatus and instruments, for transmitting and receiving equipment [on-board units], for navigation equipment; preparation of databases; operation of data centers, namely leasing of computer capacities in computer centers; design and planning of telecommunications equipment; technical consultancy via help desk services and hotline services; technical development of magnetic and chip cards and other computer-aided verifications; electronic data storage; design of internet sites and homepages; creation of internet sites and homepages; drawing up of technical damage reports; research and preparation of technical reports in the field of industrial freight and commercial passenger transport services, namely preparation and technical evaluation of reports and statistics on the localization of vehicles in real time and for the transmission of data of vehicle use and vehicle handling [for example travel time, speed, accelerations] as well as comparison and evaluation of the GEO-positions of vehicles with maps used GEO-positions; creation of software for sending automated reports; creation of software for the remote access to On-Board-Units to update and/or extend the personalization data, for updating the software version of the On-Board-Unit operating system, and for updating maps or other data relevant to toll collection; creation, installation and adaptation of application software for multimedia content delivery and customized software for navigation devices.
- Klasse 43 Reservation services for hotels.
- Klasse 45 Legal consulting on taxation; legal consultancy services in the field of security, namely relating to data protection, data security, data access, data archiving services, certification services, testify services (security strategies); consultancy and advice services relating to legal questions concerning road safety.

Klasse 4 Industrial oils and industrial greases; liquid fuels; fuel gas; all the aforementioned goods as motor vehicle operating resources.

Klasse 9 Computer programs (recorded or downloadable) for transportation of goods and freight logistics as well as vehicle management; computer programs for apps for driving as economically as possible and for economical refueling in order to reduce fuel costs; computer programs for creating weekly results reports in transportation and vehicle management; magnetic cards, magnetic identification cards; memory cards and microprocessor cards; electronic global positioning systems; systems consisting of sensors and computer software for the geolocation and for the recognition of positions or for the recognition of passages; electronic geotracking apparatus and instruments for geolocation via satellite, known as GPS or GPS-GPRS; telematic (data transmission) and GPS vehicle locating systems for the localisation of vehicles in real time and for the transmission of data of vehicle use and vehicle handling; non-voice telecommunication apparatus and instruments for the transmission of data over short distances between road systems and mobile units; data cards for third generation cellular telephone networks; GSM-type (Global System for Mobile Communication) data cards, called GPRS-compatible (General Packet Radio Services) data cards having the standard of broadband wireless telephones; apparatus for recording, transmission and reproduction of sound and images; computer software and software for the traffic management on roads and motorways, for the toll management and for the creation of road itineraries/routes; computer software; measuring, detecting and monitoring instruments and devices; acceleration sensors for the measurement of the speed-up behaviour and braking characteristics, also independently of geopositioning; electronic transmitting and receiving apparatus [on-board units] for use on toll roads; radio and telecommunications apparatus as well as navigation, direction finding and localization apparatus; transmitters, transceivers; receivers; electric receivers; antennas; sensors; control and monitoring apparatus; satellite navigation instruments; distance recording and measuring apparatus; data processing apparatus and computers; communication apparatus; programmed machine-readable data carriers of all

kinds; navigation apparatus for vehicles (on-board computers); mobile apps; application software for mobile devices, for mobile operating systems, for navigation devices, for smartphones, for wireless devices, for cloud computing services; application software for mobile devices with traffic light systems for displaying current and forecast fuel prices; apps for evaluating petrol stations; apps for individual conditions in transport and vehicle management and for the display of petrol station networks; apps for the creation of road itineraries/routes; apps for the display of driving styles in the areas of braking, speed, acceleration and cruise control; smartphones; computers; internet of things [IoT] gateways; internet of Things [IoT] sensors; computer application software for use in implementing the Internet of Things [IoT]; computer hardware modules for use in electronic devices using the Internet of Things [IoT]; apps for mobile payments; apps for the digitalization of tank cards; logistics software; telemetering apparatus for automotive vehicles and for engine applications; software for the logging of error signals; computer programs for remote maintenance for configuration and maintenance of charging infrastructure with remote control and access, e.g. reboot by remote, reconfiguration, applying updates; computer programs for remote access to manually start/stop loading operations; remote diagnostic software for Second Level Support; computer software for use as an application programming interface [API], namely API interfaces for data provisioning (static/dynamic POI [Point of Interest] data); software for CDR validation [Charge Detail Record = protocol in electric vehicle charging infrastructure for billing] and processing for billing purposes, and for BDR enrichment and processing for billing purposes [Billing Detail Record]; interoperability connection/interface [interface devices or programs for computers] via OCPP/OCPI/O1CP/SOAP/Json [OCPP = Open Charge Point Protocol = Free Charging Point Communication Standard / OCPI = Open Charge Point Interface = interface between electric vehicle charging stations and e-mobility operators / OICP = Open Interchange Protocol/SOAP = Simple Object Access Protocol = network protocol/JSON = JavaScript Object Notation = data exchange program] for billing purposes; credit cards; parts of all the aforementioned goods [included in this class]; software for geofencing; road vehicle communication interface between vehicle and charging station; software for integrating data relating to mobile payment solutions into HMI services [board computer in vehicles], whereby transactions are digitally activated via the board computer and payment transactions are thus processed in the vehicle; software for integrating mobile fueling into HMI software [Human Machine Interface]; downloadable mobile applications to enable mobile payment transactions for various DKV products [fuel, parking, toll], namely without using a physical fuel card.

Klasse 12 Parts and accessories for vehicles included in this class.

Klasse 35 Services of a filling station and its sales and service areas, namely computer-based preparation and balancing of invoices of fees for frontier-clearance (office functions); computer-based preparation of invoices of cargo and cargo procurement costs (office functions); customs clearance and ferry-boat services, namely arrangement of contracts for third parties for the assignment of access authorizations for toll lanes and tunnels through the mediation of contracts for the purchase and sale of vignettes and the input of data in data processing apparatus (office functions); computer-based preparation of invoices of tunnel fees (office functions); computer-based preparation of invoices of repair services (office functions); computer-based preparation of invoices of fuels (office functions); processing of foreign value-added mineral oil tax returns in different countries (office functions); processing of energy tax refund (office functions); services in the field of the cashless in-transit

provisioning of nationally and internationally active businesses involved in industrial goods and passenger transport, of commercial vehicle fleets of passenger vehicles and/or lorries, and in the transport sector, namely billing (within the scope of cashless payment transactions) based mainly on software programs developed in a customer-oriented way, computer-aided billing (within the scope of cashless payment transactions) and billing management for fuel, ferry fees, motorway fees, toll fees and/or value-added tax; customer invoicing, for others; accident services, namely procurement of contracts for others for replacement vehicles and tow vehicles as well as towing services; price comparison services, in particular provision of information relating to the price of fuels at home and abroad; business management; business administration; office functions; accounting services; auditing; consulting [personnel management consulting] in organizational as well as personnel matters for third parties; marketing [sales research]; market research; opinion polling; public relations; personnel and job placement; personnel recruitment; preparation of cost-price analyses; consulting on the organization and management of companies; consulting on management issues; procurement services for third parties [acquisition of goods and services], in particular procurement of materials, supplies; systematization and compilation of data in computer databases; business consulting and processing in the field of software-supported services in the area of billing services, namely business consulting in the preparation of billing statements [office functions] based primarily on software programs developed with customers; submission of refund requests via electric portals of individual customer financial authorities [office functions]; office functions relating to development and design of forms for third parties and updating of forms in the field of financial services; management, processing and dispatch of overdue notices [office functions]; monitoring and posting of refund amounts [office functions]; advertising; recording of personal and vehicle-related data (office functions); office functions, namely computer-based compilation and processing by preparation of statistics and statistical analysis of vehicle master data, of tank data, of invoices, of motor vehicle costs and revenues; statistical evaluation of GEO positions of vehicles as compared to geopositions of the maps used; office functions, namely computer-based order planning including systematically updating data in computer databases for planning both in terms of organization and business planning of the availability of motor vehicles and orders; address administration; business management relating to fleet control and fleet management of cars and trucks; business administration relating to filing of documents [except insurance documents], brokerage of tires; consumer information, namely providing information and advice for consumers in matters of cashless in-transit supply in the field of goods and passenger transport; office functions, namely compilation of information and setting up notification functions to send automated reports; compilation of business information; advertising in the field of toll collection and transport infrastructure; advertising, including advertising with brochures for promotional purposes; information in business matters, especially handled online via a hotline; conducting, organizing, preparing reports in the field of national and international commercial road transport of goods and passengers, namely preparing and evaluating reports and statistics on the localization of vehicles in real time and data on vehicle use and driving behavior [e.g. driving time, speed, accelerations]; arranging contracts for third parties for the provision of replacement vehicles; management and monitoring of incentive schemes; organization and management of customer loyalty schemes including for commercial, promotional and advertising purposes; evaluation of companies (filling stations); benchmarking services; compilation of

different filling station services and fuel offers, for others, to facilitate the comparison and purchase of these services; data entry and data processing (collection, systemization, updating and maintenance of data) in computer data bases (office functions); business management for radio mobile services; management of telephone call-centers for third parties for the execution of contracts for the rental of cars and trucks; all the aforementioned services rendered by means of a global or local computer network and/or by means of the Internet; consulting services related to payroll; business consulting services related to the establishment of wage, salary and classification structures, declaration of the minimum wage in certain EU countries, assistance and advice on the submission of documents to public authorities in accordance with the EU directive 96/71/EC; business comparison services; administrative services for companies, such as ticket management/remote charging station management, also via helpdesks; publication of publicity materials relating to prices and opening time; processing of commercial transactions with regard to ad-hoc charging [direct payment]; management and compilation of contact data for mobile applications in computer databases, customer portals and interfaces in order to use connected services; performance of data analyses/interpretations, customer analyses and behavior predictions for business purposes; billing of mobile transactions [office functions]; commercial and business services related to electricity trading, namely in relation to electricity purchasing pools, marketing advice and/or energy purchase management, load profile optimization; portfolio management, demand aggregation and price negotiations; electricity customer acquisition through mail order advertising; collection and processing of collected telematics data [office functions]; business administration relating to logistics management in the areas of transport and dispatch services; office work in the form of maintenance of supplier data/prices [tariff management]; retail services with batteries, hydrogen and alternative motor vehicle fuels; cooperation with third party credit card and prepaid credit card issuers or credit card and prepaid credit card providers, namely formulation and conclusion of contracts with aforementioned companies; business administration relating to verification of booking errors; services in the field of the cashless in-transit provisioning of nationally and internationally active businesses involved in industrial goods and passenger transport, of commercial vehicle fleets of passenger vehicles and/or lorries, and in the transport sector, namely preparation and balancing of invoices (billing) (within the scope of cashless payment transactions) based mainly on software programs developed in a customer-oriented way, computer-aided billing (within the scope of cashless payment transactions) and billing management for fuel, ferry fees, motorway fees, toll fees and/or value-added tax; providing information on the price of fuels in the country and abroad; provision of dynamic pricing information for loading operations.

Klasse 36 Financial services; factoring; collection services, in particular the collection of outstanding debts [collection operations] and the management of debts [asset management], in particular research, investigation of asset relationships for the classification of debts and debt risks and the monitoring of payment terms; financial processing of VAT refund payments within the framework of net invoicing [NIP], normal refund [NE] and deferral of payments; processing of credit financing [financial services] within the framework of NIP via banks and other credit institutions, including bank consortia as borrowers; electronic processing of mineral oil tax refund payments in various countries, in particular in the EU area; processing of energy tax refunds; financial consulting in the area of real estate and finance, except insurance; issue of service cards with payment function to industrial freight and passenger transport businesses for the cashless in-

transit supplying of automobiles, heavy trucks, busses and their drivers; computer-based settlement of finance transactions/ deals with service cardshaving a payment and a legitimation function; electronic processing of foreign value-added mineral oil tax return funds and refund of energy taxes; conducting cashless payment transactions in the field of payment of road toll fees and other road fees; handling electronic payment transactions; services for payment processing via service cards, in particular concluding contracts with toll plazas; financial brokerage services relating to customs clearance; financial brokerage services relating to customs clearance for providing access entitlement to toll roads and tunnels; collecting utilization fees by the issue of vignettes; providing financial information by means of vignettes; preparation of financial damage reports; brokerage of emission rights; services in connection with prepaid credit cards for electronic payment transactions, namely services for the prepaid recharging of third-party credit card providers and the company's own credit cards as part of security services, e.g. in the event of breakdowns for truck drivers to pay for repairs on site; issuance of credit cards and prepaid credit cards and electronic payment processing; electronic capital transfer by means of on-board computers in vehicles, including HMI services; execution of financial transactions, namely recording, processing and settlement of mobile transactions for mineral oil companies and end customers.

Klasse 37 Services of a motor vehicle repair workshop; services of service stations and their sales and service areas, namely cleaning of motor vehicles, repair of motor vehicles; breakdown assistance, namely repair of motor vehicles on site and at motor vehicle repair shops; maintenance of motor vehicles; repair of tyres and motor vehicle cooling systems; maintenance of tyres and motor vehicle cooling systems; operation of a multilingual breakdown service via a hotline on the Internet, namely advice from motor vehicle specialists on repairing vehicle breakdowns; installation of toll logging and toll billing equipment; maintenance of toll logging and toll billing equipment; installation and maintenance of units equipped with a system for geolocalisation and position recognition or for recognition of passages; installation and maintenance of electronic satellite geotracking apparatus and instruments, known as GPS or GPS-GPRS; installation and maintenance of telematic (data transmission) and GPS-vehicle locating systems for the localisation of vehicles in real time and for the transmission of data of vehicle use and vehicle handling as well as for the proof management concerning delivery of freights; installation and maintenance of non-voice telecommunication apparatus and instruments for the transmission of data over short distances between road systems and mobile units; installation and maintenance of apparatus for recording, transmission and reproduction of sound and images, installation and maintenance of electronic transmitting and receiving equipment [on-board units] for use on toll roads; installation, repair and maintenance of radio and telecommunications equipment as well as equipment for navigation, direction finding and localization, transmitters, transceivers, receivers, antennas, sensors, control and monitoring equipment; geofencing, namely, installation of control and monitoring devices in vehicles in defined areas; reservation of charging stations for users in the e-mobility sector; vehicle battery charging services at the charging stations with electricity from photovoltaics.

Klasse 38 Telecommunications (telecommunications services) including radio services, namely radio guidance of motor vehicles in industrial freight transportation; mobile telephony services; provision of online access for multilingual breakdown services, namely provision of access to technical expertise with regard to roadside assistance via the Internet; providing access to and transmission of messages, data and information on the Internet; telecommunication services for nationally and

internationally operating industrial freight and commercial passenger transport services, namely the transmission of information about the state of roads, the traffic situation, the location of service stations, the location of vehicles, technical vehicle matters, the price of fuel at home and abroad via the Internet and radio services; transmission of information via computer servers, data transmission services with free access; telematics services, including freight tracking and proof management regarding the delivery of freight; data transmission services, namely data entry of geoposition, engine and speedometer data; transmission and exchange of information via multimedia carriers; telecommunications services for geolocalisation purposes; providing access to a worldwide computer network; providing connections to a worldwide computer network by means of telecommunications; delivery (transmission) of automated reports via electronic mail services; providing access to online data in computer networks; telephone services for hotlines; rental of telecommunications equipment for the transmission of messages and on-board units; professional consultancy on the field of telecommunications, in particular with regard to geolocalisation installations in connection with traffic conditions on road and motorway networks and with regard to on-board units; telecommunications services for remote access to on-board units for the purpose of updating and/or extending the personalization data; transmission of charging/consumption data [in compliance with calibration regulations]; provision of access to data or documents stored in central files for remote diagnostics [Second Level Support]; telecommunication services for connected-car services [connected automobiles] in and outside the vehicle through remote access, either via a fixed communication model with integrated SIM card or via the hotspot function of an external device, e.g. a smartphone; provision of access to Internet platforms for connection to digital fleet maps; online-telephone services via an information, complaint and emergency hotline.

- Klasse 39 Rental of construction vehicles and other special-purpose vehicles; tracking of passenger or freight vehicles by computer or via GPS (transport information); vehicle breakdown services, namely vehicle towing and rescue services; accident services, namely providing replacement vehicles, towing vehicles and a towing service; automobile towing services; car rental; rental services, namely rental of busses and vehicles for the freight forwarding sector; rental of vehicle accessories, in particular luggage racks, child safety seats, vehicle trailers, snow chains; transport of motor vehicles by rail; rolling road (intermodal transportation), namely transport systems whether or not accompanied for the combined railway traffic, namely transport of complete trucks or semi-tractor trailers by rail; packaging of goods; storage of goods; travel arrangements; transshipment of transport goods; information services for the nationally and internationally operating industrial freight and commercial passenger transport, namely providing information about the state of roads, the traffic situation, the location of service stations, the location of vehicles, technical vehicle matters; tracking of broken-down commercial vehicles with computers by means of computer-aided map systems as well as by means of electronic navigation and positioning devices; car navigation systems (road guidance systems) via mobile radiotelephony, namely controlling of fleet vehicles using electronic navigational and positioning apparatus as well as via radio services; transport services, in particular freight forwarding, except the customs clearance of goods; provision and operation of an online reservation system, namely provision of transport appointments for goods on the Internet; telephone advice via a call center on the execution of contracts for the rental of cars and trucks; advice in the field of transport, handled via hotlines; provision of

information, namely city, travel and traffic information; delivery of teleshopping offers for others; booking of travel; parking space search service [provision of information on the availability and location of parking spaces, display of free parking spaces using electronic navigation and positioning devices]; itinerary travel advice services; route planning in the form of travel route consulting services; freight brokerage; cash supply for third parties through delivery of cash by contractual partners; navigation services [IoT (Internet of Things)-based GPS positioning]; information services for nationally and internationally operating commercial goods and passenger transport with regard to road conditions, the traffic situation, the location of car stations, the location of vehicles, and technical data of vehicles; navigation and tracking services via user frontend [eOperated Portal/eCharge App] regarding the position of charging stations.

- Klasse 41 Provision of multilingual breakdown services, namely interpreting services; reservation of tickets for entertainment events; organization of competitions; coaching with the aim of increasing the motivation of users, operators; holding of lecture events for cultural purposes and workshops [training]; education; training; entertainment; development of training and education concepts, including training and education events for education and training; organization of recreational events; organization of conferences; organization and holding of congresses; organization and holding of symposiums; organization and holding of colloquiums; organization and holding of training events related to franchising concepts; education and training in the field of franchising; publication and editing of books, brochures [except for promotional purposes] and training materials.
- Klasse 42 Installation and maintenance of software for toll registration and toll invoicing devices as well as for systems for the global positioning and position recognition or recognition of passages, for electronic apparatus and instruments for geotracking via satellite, for transmitting and receiving apparatus [on-board units], for navigation apparatus; design and development of databases; creation, updating and maintenance of computer software and programs for data processing, except for the insurance sector; operation of data centers, namely leasing of computer capacities; design and planning of telecommunications equipment; technological consultancy via help desk services and hotline services; technical development of magnetic and chip cards and other computer-aided verifications; electronic data storage; design of internet sites and homepages; creation of internet sites and homepages; drawing up of technical damage reports; IT services, namely setting up notification functions to send automated reports; research and preparation of technical reports in the field of industrial freight and commercial passenger transport services, namely preparation and technical evaluation of reports and statistics on the localization of vehicles in real time and for the transmission of data of vehicle use and vehicle handling [for example travel time, speed, accelerations] as well as comparison and evaluation of the GEO positions of vehicles with GEO positions of the maps used; creation of software for sending automated reports; creation of software for the remote access to on-board units to update and/or extend the personalization data, for updating the software version of the on-board unit operating system, and for updating maps or other data relevant for toll collection; creation, installation and adaptation of application software for multimedia content delivery and customized software for navigation devices, smartphones, computers, except for insurance; design and development of computer software for logistics, supply chain management and e-business portals; creation of computer software and programs for data processing, especially in the field of finance [except insurance] and real estate; research and searches in databases for science and research; scientific and technological

services and research and related design services; industrial analysis and research services; design and development of computer hardware and software, in particular the creation of computer software and programs, except for the insurance sector; configuration and maintenance of charging infrastructure by means of computer software through remote access [remote maintenance]; updating of software and apps for mobile devices via over-the-air programming [OTA]; load management to control peak loads [energy sector], namely monitoring and controlling energy consumption (electrical energy); energy management in the form of software as a service [SaaS] for feeding in as well as controlling the amount of electricity consumed on the basis of statically stored limit values or dynamically acting systems; technical control of bi-directional charging processes including associated billing processes; quality assurance and optimization of POI [Point of Interest] by means of technical-mathematical consulting in the areas of algorithms and interface connections; programming of data export software; online provision of non-downloadable apps for the digitization of [fuel] cards to enable processing via online transactions without reading the card details of the physical card; provision of mobile applications to enable contactless payment with digitized fuel cards via an app at the terminal; provision of mobile applications [apps] to enable mobile payment transactions for DKV products [fuels, parking, tolls]; development and further development of a platform to connect other cards, e.g. Switch-Out, co-brand partners or other fuel cards, digitally in a wallet in addition to the DKV card and conducting the related required transactions; further development of a platform that enables acceptance of mobile transactions; development of a central platform to which card transaction acceptance points can be connected to enable the acceptance and processing of mobile transactions; technical consulting services and technical support in the field of software for the expansion of the electric charging infrastructure, especially for municipalities and private homes; online provision of non-downloadable white label apps [user surfaces] for carrying out the management of certain activities, especially in the field of electromobility, in particular initiating and monitoring charging; design and development of software for connected-car [web-enabled networked automobiles having telematic functions] services in and outside the vehicle by remote access, either via a fixed communication model with integrated SIM card or via the hotspot function of an external device, e.g. a smartphone; provision of temporary use of web-based software for development environments with a structured graphical user interface [white label frontends]; user authentication services for access control via RFID [automatic identification and localization of living beings and data using electromagnetic waves], via app authorization and via QR code; technological consultancy for clients and users on computer networks; technical monitoring of charging infrastructure with regard to e.g. average consumption, charging times, fault messages, energy quantity; technical limit control of maximum purchase quantities, namely allocation of maximum purchase quantities of fuels.

Klasse 43 Reservation services for hotels.

Klasse 45 Legal services; security services for the protection of property and persons; personal and social services concerning individual needs, namely home guarding services, personal analysis and investigation services, personal shopping services, pastoral counseling, technical inspection and control of security devices and equipment [alarm circuits, alarm systems and technical security devices] by security services, social networking services, private letter writing, pet sitting services, political lobbying services, reminder services, companionship services; licensing of franchise concepts; licensing of industrial property rights and copyrights; management of copyrights and industrial

property rights, in particular patents, utility models, designs, including trademark rights; legal services, namely legal prosecution within the framework of claims management; customer care through legal consultations in tax matters, in particular in the EU area, preferably within the framework of tax identification numbers (NIP), new deposits (NE) and deferrals of payments; consultancy in intellectual property and industrial property matters; licensing in intellectual property and industrial property matters, including in the field of copyrights; licensing of industrial property rights; legal consulting on taxation; legal consultancy services in the field of security, namely data protection, data security, data access, data archiving, certification, testifying (security strategies); consultancy relating to legal questions concerning road safety; providing advice in the area of workplace safety, namely in setting minimum standards for working conditions for workers posted by employers based abroad to provide services across borders in accordance with the EU directive 96/71/EC.
